

Solving - Two Step #2 - Practice

Solve each equation.

1) $-1 = \frac{x + 8}{10}$

2) $1 = \frac{m + 5}{4}$

3) $\frac{r + 8}{12} = -1$

4) $-2 = \frac{x - 4}{11}$

5) $-3 + \frac{p}{4} = -4$

6) $\frac{a}{4} + 1 = 2$

7) $-6 = -5 + \frac{x}{9}$

8) $-14 = \frac{r}{2} - 9$
